

WORKSHOP

Philippe Bailleur

Dealing with Organizational Trauma

April 4-5, 2019
Middelfart, Denmark

Sund & Skov proudly presents Phillippe and the topic of dealing with traumas in organizations. Phillippe has been working as a coach in corporate environments for more than 20 years. The co-development of individuals, organizations and society is a huge source of inspiration in his work.

Trauma has been running through his life like a red thread. This has forced him to unravel some of the recurring patterns about organizational health and trauma.

He is utterly convinced that healthy organizations can become Forces for Good and that's exactly why he started writing on this topic.

He wants as many people as possible, that work with organizations (leaders, coaches, consultants, ...), to recognize organizational trauma. And he's looking forward to teach and co-develop ways to deal with it.

On behalf of my team we wish you all welcome.
Annette Thiesen
